

MyDataCoin

Invest in MyDataCoin - the ultimate solution for personal data protection and monetization!

SUMMARY

Privacy made simple with MyDataCoin.

MyDataCoin is a revolutionary **blockchain-based platform** that enables revenue sharing of Personally Identifiable Information (PII). Unlike traditional systems where businesses solely profit from people's data, our platform allows users **to take control** of their **data privacy** and benefit financially from their information.

Compliance Monitoring

Digital dividends

Personal Data Marketplace

Data monetization standard

PROBLEM

MyDataCoin aims to address these problems by providing a more transparent, ethical, and equitable model for personal data exchange.

Lack of control over personal data

Many individuals currently have little control over how their personal data is being used, and may not be aware of the full extent of data collection and sharing by companies.

Privacy concerns

The current personal data market often lacks transparency and may not adequately protect individuals' right to privacy.

Inequitable distribution of digital dividends

Currently, companies often generate significant value from personal data, while individuals receive little or no benefit from the use of their data.

Lack of trust

The personal data market can be opaque and difficult to navigate, leading to a lack of trust among both individuals and businesses.

Regulatory compliance

Companies operating in the personal data market may struggle to comply with evolving regulatory requirements, leading to potential legal and reputational risks.

SOLUTION

The MyDataCoin ecosystem includes several components, including:

1. A **non-custodial wallet** for storing MyDataCoin tokens and managing digital consent for controlling personal data.
2. A personal data **marketplace** where individuals can choose to share their data with trusted companies in exchange for MyDataCoin tokens.
3. **Decentralized and secure ledger** that enables the transparent and efficient exchange of personal data while protecting the privacy and rights of individuals.
4. An identity verification system based on **Self-Sovereign Identity** (SSI) principles.
5. A **compliance monitoring system** that ensures that data buyers comply with data protection regulations.

ADVANTAGES

Governments and Businesses should support MyDataCoin and be interested to be part of the product

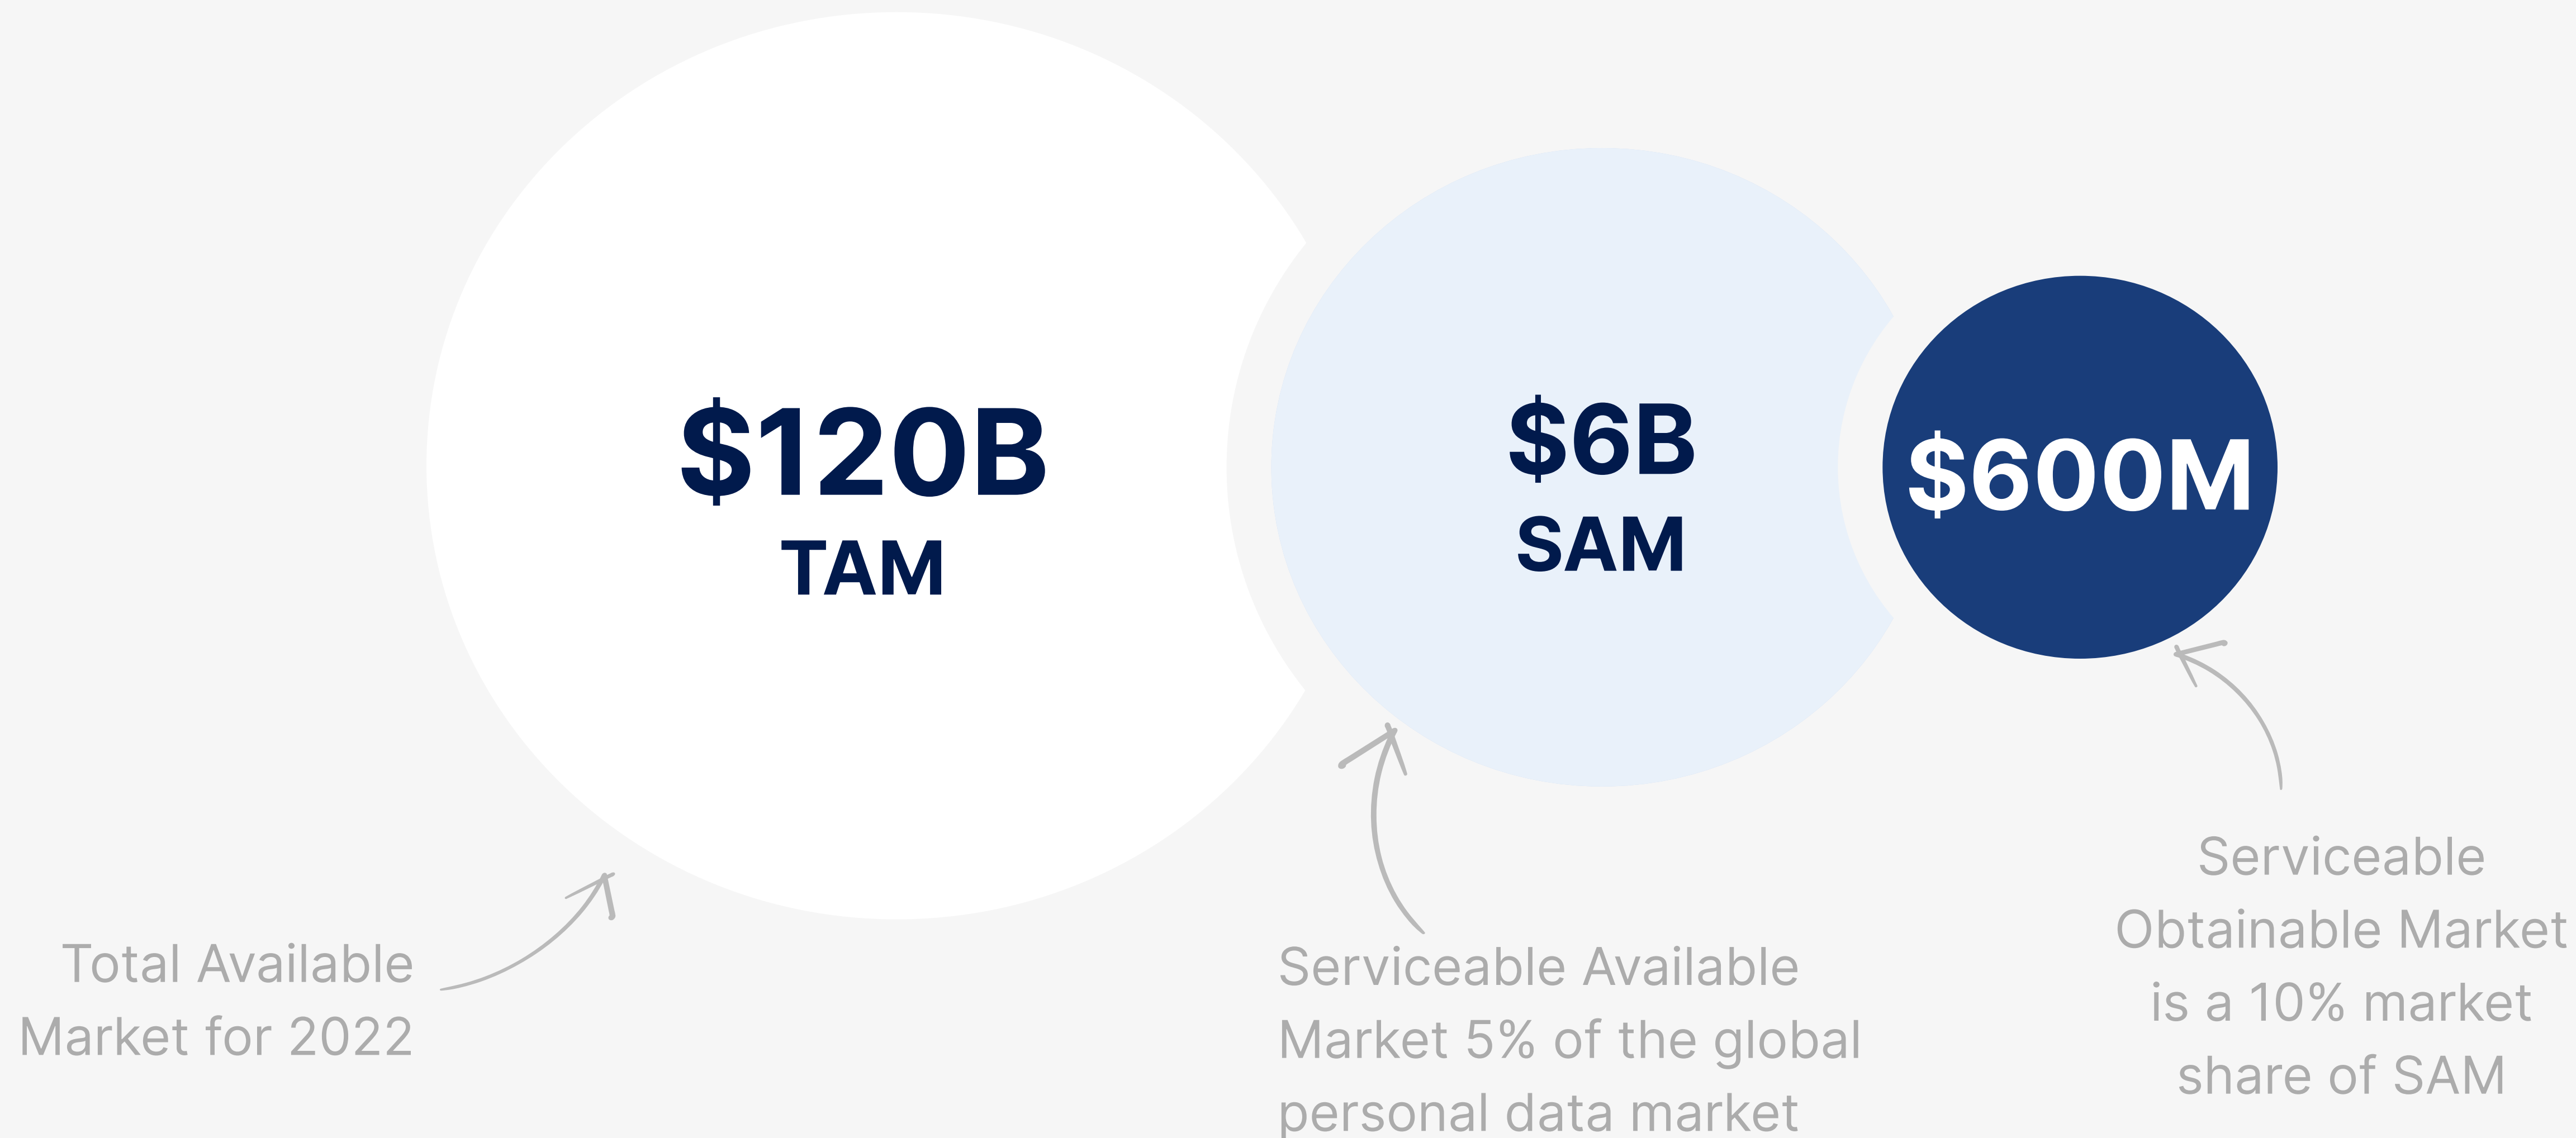

In terms of governments, MyDataCoin can help with **data regulation and protection**. By offering a secure and transparent platform for individuals to control and monetize their personal information, MyDataCoin can help governments address growing concerns around data privacy and security.

For businesses, MyDataCoin can enable enhanced customer engagement by allowing individuals to share their personal information with businesses **on their own terms**. Our platform will help with compliance with data protection regulations and also build trust and loyalty among customers.

MARKET SIZE

Annual growth rate (CAGR) of around 25% from 2022 to 2028

COMPETITION

Comparison

The competitive advantage of MyDataCoin lies in its ability to provide a secure and transparent platform that enables individuals to maintain control over their personal data while facilitating fair and transparent trading.

MyDataCoin will partner with influencers in the data privacy and blockchain space to promote the platform to their followers.

Content marketing

MyDataCoin will create informative and engaging content such as blog posts, videos, and webinars to educate users about the platform and the benefits of joining.

Referral marketing

MyDataCoin will incentivize existing users to refer their friends and colleagues to the platform.

Target audience

18 - 35 y/o

uses various online services and platforms, such as social media, e-commerce, and financial services

Additionally, the target audience may include organizations and businesses that are interested in accessing reliable and high-quality personal data for their marketing and research purposes.

THE ASK

Seed round

Expansion and growth

As MyDataCoin grows and expands into new markets, it will need to raise funds to support its expansion efforts, including hiring new staff, opening new offices, and investing in new technology.

Marketing and promotion

MyDataCoin need to acquire new users through a number of different channels and strategies.

Legal and regulatory compliance

MyDataCoin need to cover the costs of legal and regulatory compliance, such as obtaining licenses and certifications, and ensuring that the platform is compliant with data protection and privacy regulations.

Raising

\$2,92M

We are looking for \$2,92M for 14,6% of total token supply, linearly vested in 48 months.

VISION

Future vision

MyDataCoin's future vision is to become the **leading ecosystem** that empowers individuals with **control over their data**, while also ensuring a trusted and transparent distribution of digital dividends. We strive to achieve this by offering a comprehensive Solution as a Service (SaaS) that represents citizens' interests, promotes fair distribution of digital dividends, and acts on behalf of the population. By meeting the expectations and requirements of all stakeholders, we aim to generate a high demand for our services and create a trusted ecosystem of partners. Our ultimate goal is to revolutionize the way data is managed and utilized, enabling a more equitable and prosperous digital economy for everyone.
